Author Index to Volume 43

Aggarwal, S.—
See Pasricha, P. K. 107
Allen, L. J., McCarthy, I. E., Maslen, V. W., and Rossouw, C. J.—
Effects of diffraction on the (e, 2e) reaction in crystals 453
Alvarez, G.—
See Bailey, A. 347
Atkinson, I. M.—
See McKay, R. I. 683

Bailey, A., Alvarez, G., Puzzer, T., Matthews, D. N., Sealey, K., Russell, G. J., and Taylor, K. N. R.—
Fabrication of superconducting YBCO thick films on YSZ substrates 347
Corrigendum 813
Baskakov, V.—
See Pasricha, P. K. 107
Bennett, F. R.—
See McKay, R. I. 683
Bieske, E. J.—
See McKay, R. I. 683
Binarh, H. S., Singh, H., Ghumman, S. S., and Sahota, H. S.—
K-capture in the decay of ^{191}Pt 283
Bobra, A. D.—
See Slee, O. B. 801
Boyle, B. J.—
The clustering and evolution of QSOs 251
Bradley, A. J.—
See McKay, R. I. 683
Brennan, M. J., Garvie, A. M., and Kelly, L. J.—
Monte Carlo investigation of $E \times B$ discharges in molecular nitrogen 27
Brennan, M. J., and Garvie, A. M.—
An experimental investigation of electron transport in $E \times B$ discharges 765
Brennan, M. J.—
See Garvie, A. M. 779
Brunger, M. J., Buckman, S. J., and Newman, D. S.—
Low energy electron scattering from H_2 665
Buckingham, A. D.—
Linear and nonlinear light scattering from the surfaces of liquids 617
Buckman, S. J.—
See Brunger, M. J. 665

Chambliss, D. D.—
See Wilson, R. J. 393
Chelkowska, E. Z.—
See Larkins, F. P. 625
Chen, X.—
See O'Connor, D. J. 601
Cheung, B., and Elford, M. T.—
The drift velocity of electron in water vapour at low values of E/N 755
Chiang, S.—
See Wilson, R. J. 393
Clare, B. W.—
See Lund, C. P. 535
Clay, R. W.—
See Smith, A. G. K. 373
Collins, J. G.—
See White, G. K. 93
Condon, J. J.—
See Savage, A. 241
Cornish, J. C. L.—
See Lund, C. P. 535
Couch, W. J.—
Evolutionary studies of galaxies at intermediate redshifts 271

Dai, X. D., Ito, Y., and Ja, Y. H.—
Self-focussing of laser beams in cadmium manganese telluride $Cd_{0.4}Mn_{0.6}Te$ 303
Das, G. C., and Karmakar, B.—
Characteristics of the solitary waves in multicomponent plasmas 65
Das, G. C., and Singh, Kh. I.—
Soliton characteristics at the critical density of negative ions in ion-beam plasmas 311
Donnelly, I. J., and Rose, E. K.—
Ion densities in low temperature nitrogen plasmas 45
Durrant, C. J.—
Corrigendum to Linear force-free magnetic fields and coronal models 813

Einasto, J.—
Formation of the structure of the universe: Observational aspects 145
Elford, M. T.—
See Cheung, B. 755

Garvie, A. M., and Brennan, M. J.—
A tomographic investigation of variations in the excited state populations of $E \times B$ discharges 779
Garvie, A. M.—
See Brennan, M. J. 27, 765

Ghumman, S. S.—
See Binarh, H. S. 283
Grech, D. K.—
Tumbling for exotic fermionic representations in grand unified models 1
Gulkis, S.—
See Savage, A. 241

Hauback, B. C., Mo, F., and Thorkildsen, G.—
Correction of X-ray intensities for multiple diffraction 77
Hayes, P. A.—
See Williams, J. F. 465
Hefter, G. T.—
See Lund, C. P. 535
Hitchen, G., Thurgate, S. M., and Jennings, P. J.—
A LEED fine structure study of oxygen absorption on Cu(001) and Cu(111) 519
Hunstead, R. W., and Pettini, M.—
The Lyman α forest in QSOs: A window on intergalactic clouds at high redshift 211
Hunstead, R. W.—
See Pettini, M. 227

Ito, Y.—
See Dai, X. D. 303

Ja, Y. H.—
See Dai, X. D. 303
Jauncey, D. L.—
See Savage, A. 241
Jennings, P. J.—
See Hitchen, G. 519
Lund, C. P. 535

Karmakar, B.—
See Das, G. C. 65
Kelley, M. H.—
Uses of spin-polarised electrons in fundamental electron–atom collision processes and the analysis of magnetic microstructures 565
Kelly, L. J.—
See Brennan, M. J. 27
King, B. V.—
See O'Connor, D. J. 601
Klauber, C.—
See Lund, C. P. 535
Knight, A. E. W.—
See McKay, R. I. 683
Kolomitsev, O. P.—
See Pasricha, P. K. 107

Larkins, F. P., Tulea, L. C., and Chelkowska, E. Z.—
Auger electron spectra of molecules: The first row hydrides 625
Leckey, R., and Riley, J.—
Photoelectron spectroscopy of solids—VUV bandstructure studies 651
Lim, J.—
See Slee, O. B. 801
Lukash, V. N.—
Primordial perturbations, early evolution and dark matter 123
Lund, C. P., Clare, B. W., Cornish, J. C. L., Hefter, G. T., Jennings, P. J., and Klauber, C.—
Auger lineshape analysis of disorder and rehydrogenation induced changes in the electronic structure of silicon surfaces 535

McCarthy, I. E.—
Electronic structure of atoms, molecules and solids from (e, 2e) studies 419
See Allen, L. J. 453
McCarthy, I. E., and Zhang, X.—
Distorted-wave Born approximation for the ionisation of hydrogen by electrons 291
MacDonald, R. J.—
See O'Connor, D. J. 601
Macek, J.—
Anisotropy parameters and adiabatic approximations for two-electron atoms and ions 641
MacGillivray, W. R., and Standage, M. C.—
Applications of lasers to collision studies 401
McKay, R. I., Bieske, E. J., Atkinson, I. M., Bennett, F. R., Bradley, A. J., Rainbird, M. W., Rock, A. B., Uichanco, A. S., Knight, A. E. W.—
Spectroscopy and structure of aromatic–rare gas cluster ions 683
McRae, E. G., and Malic, R. A.—
Applications of low-energy electron diffraction to ordering at crystal and quasicrystal surfaces 499
Malic, R. A.—
See McRae, E. G. 499
Maslen, V. W.—
See Allen, L. J. 453
Mathewson, D. S.—
The Great Attractor—A cosmic string? 167
Matthews, D. N.—
See Bailey, A. 347

Melrose, D. B.—
Particle acceleration processes in the solar corona 703
Mitroy, J.—
The momentum transfer cross section for krypton 19
Mo, F.—
See Hauback, B. C. 77
Murphy, J. O.—
Annual reconstruction of the solar cycle from atmospheric ^{14}C variations 357

Nasel'sky, P. D., and Novikov, I. D.—
Spectral distortions of the relic radiation from pregalactic dust and decay of the unstable particles 179
Newman, D. S.—
See Brunger, M. J. 665
Novikov, I. D.—
See Nasel'sky, P. D. 179

O'Connor, D. J., King, B. V., MacDonald, R. J., Shen, Y. G., and Chen, X.—
The study of surfaces using ion beams 601

Pain, G. N.—
See Stevenson, A. W. 793
Pasricha, P. K., Aggarwal, S., Reddy, B. M., Baskakov, V., and Kolomitsev, O. P.—
Predictability of the 12-month running averaged sunspot number in the presence of an 8-month quasi-periodicity on a solar cycle 107
Paul, S. N.—
Nonlinear instability of circularly polarised waves in a magnetised relativistic plasma 311
Peters, W. L.—
See Savage, A. 241
Peterson, B. A.—
See Savage, A. 241
Pettini, M., and Hunstead, R. W.—
Metal enrichment, dust and star formation in high-redshift galaxies 227
Pettini, M.—
See Hunstead, R. W. 211
Price, G. L.—
The growth of semiconductor thin films studied by RHEED 583
Puzzer, T.—
See Bailey, A. 347

Quinn, P. J.—
The epoch of galaxy formation 135

Rainbird, M. W.—
See McKay, R. I. 683
Raynal, J.—
Which potentials have to be surface peaked to reproduce large angle proton scattering at high energy? 9
Reddy, B. M.—
See Pasricha, P. K. 107
Riley, J.—
See Leckey, R. 651
Rock, A. B.—
See McKay, R. I. 683
Roothaan, C. C. J.—
The general MCSCF method with full symmetry reduction 439
Rose, E. K.—
See Donnelly, I. J. 45
Rossouw, C. J.—
See Allen, L. J. 453
Russell, G. J.—
See Bailey, A. 347

Saar, E.—
Large scale structure of the universe: Theoretical problems 159
Sahota, H. S.—
See Binarh, H. S. 283
Sarma, S. B. S. S.—
Elevated duct effects on radar ranges using an airborne microwave refractometer 99
Savage, A., Jauncey, D. L., White, G. L., Peterson, B. A., Peters, W. L., Gulkis, S., and Condon, J. J.—
Flat-spectrum radio sources from the Parkes 2·7 GHz survey—A study of a complete sample 241
Schirber, J. E.—
See White, G. K. 93
Sealey, K.—
See Bailey, A. 347
Shen, Y. G.—
See O'Connor, D. J. 601
Singh, H.—
See Binarh, H. S. 283
Singh, Kh. I.—
See Das, G. C. 319
Slee, O. B., Bobra, A. D., Waldon, D., and Lim, J.—
Radio source scintillations through comet tails revisited: Comet Wilson 801

Smith, A. G. K., and Clay, R. W.—
Calculations on the cosmic ray anisotropy above 10^{17} eV 373
Sokolov, K. P.—
Analysis of the astrophysical significance of radio source counts obtained in different frequency ranges 263
Standage, M. C.—
See MacGillivray, W. R. 401
Steeb, W.-H.—
See Villet, C. M. 333
Stelbovics, A. T., and Winata, T.—
A study of L^2 approximations in atomic scattering 485
Stevenson, A. W., and Pain, G. N.—
X-ray diffraction investigation of epitaxial layers of CdTe on sapphire 793

Taylor, K. N. R.—
See Bailey, A. 347
Thorkildsen, G.—
See Hauback, B. C. 77
Thurgate, S. M.—
Auger photoelectron coincidence spectroscopy 443
See Hitchen, G. 519
Tulea, L. C.—
See Larkins, F. P. 625

Uichanco, A. S.—
See McKay, R. I. 683

Villet, C. M., and Steeb, W.-H.—
Variational solutions of the Hubbard model for the bcc lattice 333
Visvanathan, N.—
The global Hubble constant 189

Waldron, D.—
See Slee, O. B. 801
Weigold, E. W.—
(e, 2e) studies of atoms—some recent developments 543
White, G. K., Collins, J. G., and Schirber, J. E.—
Thermal expansion of InBi at low temperatures 93
White, G. L.—
See Savage, A. 241
Williams, J. F., and Hayes, P. A.—
A review of (e, 2e) studies in thin films and some recent results 465
Wilson, R. J., Chiang, S., and Chambliss, D. D.—
Imaging semiconductors, metals and molecules with scanning tunneling microscopy 393
Winata, T.—
See Stelbovics, A. T. 485
Wolf, C.—
Delayed inflation of a closed cosmological model driven by the false vacuum in five dimensions 117

Zhang, X.—
See McCarthy, I. E. 291
